GitHub Guides

se00.实践作业说明, 页面 22

先看视频, 可以结合文档看

创建repository

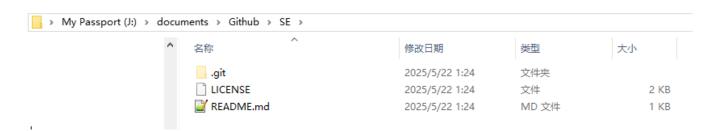

略

使用git clone+git仓库地址将某个仓库下载到本地

将更改 commit到本地git

• 初始git → My Passport (J:) → documents → Github → SE 名称 修改日期 类型 大小 .git 2025/5/22 1:48 文件夹 LICENSE 2025/5/22 1:24 文件 2 KB README.md 2025/5/22 1:24 MD 文件 1 KB

git查看修改状态

git status

```
J:\documents\Github\SE>git status
On branch main
Your branch is up to date with 'origin/main'.
nothing to commit, working tree clean
```

新建文件

```
> My Passport (J:) > documents > Github > SE >
                                                            修改日期
                                                                              类型
                                                                                             大小
                          名称
                                           新建测试文件 2025/5/22 1:48
                          .git
                                                                              文件夹
                          LICENSE
                                                            2025/5/22 1:24
                                                                              文件
                                                                                                   2 KB
                          README.m
                                                            2025/5/22 1:24
                                                                              MD 文件
                                                                                                   1 KB
                                                            2025/5/22 1:51
                          test.txt
                                                                              文本文档
                                                                                                  0 KB
ds
```

git查看修改的状态

```
J:\documents\Github\SE>git status
On branch main
Your branch is up to date with 'origin/main'.
Untracked files:
(use "git add <file>..." to include in what will be committed)
test.txt
nothing added to commit but untracked files present (use "git add" to track)
```

git指定本次commit包含的文件

```
1 git add .

J:\documents\Github\SE\git add test.txt

J:\documents\Github\SE\git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    new file: test.txt
```

git完成一次到本地git的commit

```
J:\documents\Github\SE>git commit -a -m "update"
[main d0f0957] update
1 file changed, 0 insertions(+), 0 deletions(-)
```

```
[main d0f0957] update

1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 test.txt

J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)
nothing to commit, working tree clean
```

```
| test.txt - 记事本
| 文件(F) 编辑(E) 格式(O) 查看(V) 帮助(H) | 
| hello, GitHub! | 保存
```

```
J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)

Changes not staged for commit:
(use "git add <file>..." to update what will be committed)
(use "git restore <file>..." to discard changes in working directory)
modified: test.txt

no changes added to commit (use "git add" and/or "git commit -a")
```

git加所有未保存的文件

1 git add .

```
J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)
Changes to be committed:
(use "git restore --staged <file>..." to unstage)
modified: test.txt
```

```
J:\documents\Github\SE>git commit -a -m "update2"
[main 643cb90] update2
1 file changed, 1 insertion(+)
```

只要有更改就会检测到

```
i test.txt - 记事本
文件(F) 编辑(E) 格式(O) 查看(V) 帮助(H)
hello, GitHub!
I love you!
```

```
J:\documents\Github\SE}git status
On branch main
Your branch is ahead of 'origin/main' by 2 commits.
(use "git push" to publish your local commits)
Changes not staged for commit:
(use "git add <file>..." to update what will be committed)
(use "git restore <file>..." to discard changes in working directory)
no changes added to commit (use "git add" and/or "git commit -a")
J:\documents\Github\SE>git add test.txt
J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by 2 commits.
(use "git push" to publish your local commits)
Changes to be committed:

(use "git restore --staged <file>..." to unstage)
J:\documents\Github\SE<mark>></mark>git commit -a -m "update3"
[main 4ca686e] update3
 1 file changed, 3 insertions(+), 1 deletion(-)
J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by <u>3 commits</u>.
  (use "git push" to publish your local commits)
nothing to commit, working tree clean
]:\documents\Github\SE>
```

恢复到某个commit

git看一下之前的commit

git log

```
J:\documents\Github\SE>git log
                                   81e1a7330e8402283619 (HEAD -> main)
Author: 刘苗 <13039207+1iumaomaoa@user.norep1y.gitee.com>
Date: Thu May 22 02:20:04 2025 +0800
     update3
commit 643cb90a0290b5db815e3914ff1aaaf662540608
Author: 刘苗 <13039207+1iumaomaoa@user.norep1y.gitee.com>
Date: Thu May 22 02:16:42 2025 +0800
     update2
commit d0f0957b1a6433cc78527aa6b510b8cbfc9ec37b
Author: 刘苗 <13039207+1iumaomaoa@user.norep1y.gitee.com>
Date: Thu May 22 02:06:47 2025 +0800
     update
commit 91d050759dcfa119a954ce75e14a12c2aeb38f15 (origin/main, origin/HEAD)
Author: Li1aLius <151516161+Li1aLius@users.noreply.github.com>
Date: Thu May 22 00:47:59 2025 +0800
    Update README.md
commit 4af18ee8b6f839125bd835cbe93275483c4e8337
Author: LilaLius <151516161+LilaLius@users.noreply.github.com>
Date: Wed May 21 16:32:38 2025 +0800
     Initial commit
```

git恢复到某个commit

1 git reset --hard commit_id

J:\documents\Github\SE\git reset --hard d0f0957b1a6433cc7852
HEAD is now at d0f0957 update

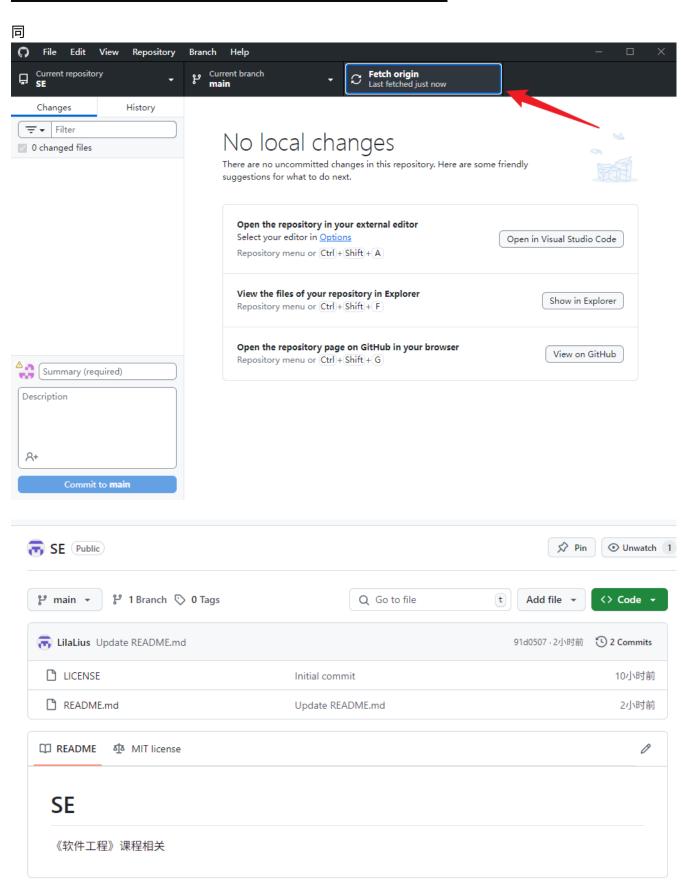

test.txt - 记事本
文件(F) 编辑(E) 格式(O) 查看(V) 帮助(H)

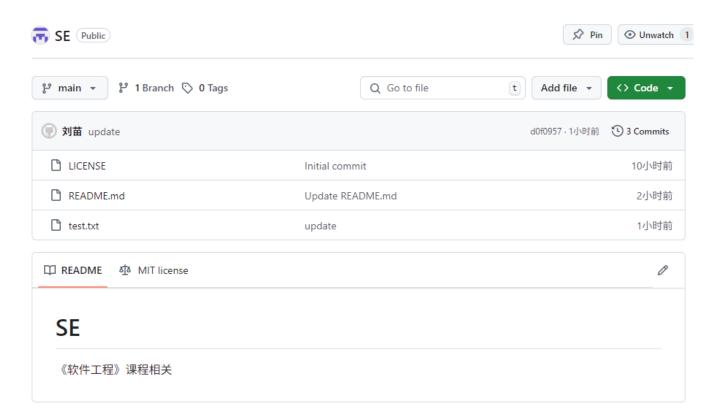

hello, GitHub!

I love you! 关掉

push和pull操作 将本地内容同步到云端

```
J:\documents\Github\SE>git push origin
Enumerating objects: 4, done.
Counting objects: 100% (4/4), done.
Delta compression using up to 8 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 324 bytes | 32.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0
To https://github.com/LilaLius/SE.git
91d0507..d0f0957 main -> main
```

从云端拉取内容

1 git pull

```
J:\documents\Github\SE>sit pull
error: RPC failed; curl 56 Recv failure: Connection was reset
fatal: expected flush after ref listing

J:\documents\Github\SE>git pull
fatal: unable to access 'https://github.com/LilaLius/SE.git/': Failed to connect to github.com port 443 after 21127 ms: Couldn't connect to server

1    J:\documents\Github\SE>git pull
2    error: RPC failed; curl 56 Recv failure: Connection was reset
3    fatal: expected flush after ref listing

1    J:\documents\Github\SE>git pull
2    fatal: unable to access 'https://github.com/LilaLius/SE.git/': Failed to connect to
github.com port 443 after 21127 ms: Couldn't connect to server
```

关闭VPN

```
J:\documents\Github\SE>git pull
fatal: unable to access 'https://github.com/LilaLius/SE.git/': Recv failure: Connection was reset
```

- 1 J:\documents\Github\SE>git pull
- fatal: unable to access 'https://github.com/LilaLius/SE.git/': Recv failure: Connection
 was reset

J:\documents\Github\SE>git pull Already_up to date.

使用分支

创建新branch

git branch 新branch名称

```
J:\documents\Github\SE>git branch
* main

J:\documents\Github\SE>git branch first_new_branch

J:\documents\Github\SE>git branch
   first_new_branch
    * main
```

要push一下

切换branch

1 git checkout

J:\documents\Github\SE>git checkout first_new_branch Switched to branch 'first_new_branch'

J:\documents\Github\SE>git status On branch first_new_branch nothing to commit, working tree clean

```
    test.txt - 记事本
    文件(F) 编辑(E) ↑
    new feature
```

```
J:\documents\Github\SE\git status
On branch first_new_branch
Changes not staged for commit:
   (use "git add \( \frac{file} \)..." to update what will be committed)
   (use "git restore \( \frac{file} \)..." to discard changes in working directory)
        modified: test.txt

no changes added to commit (use "git add" and/or "git commit -a")

J:\documents\Github\SE\git add test.txt

J:\documents\Github\SE\git status
On branch first_new_branch
Changes to be committed:
   (use "git restore --staged \( \frac{file} \)..." to unstage)
        modified: test.txt

J:\documents\Github\SE\git commit -a -m "update"

[first_new_branch 4605051] update
1 file changed, 1 insertion(+)

J:\documents\Github\SE\git status
On branch first_new_branch
nothing to commit, working tree clean
```

push

合并branch

回到主分支

J:\documents\Github\SE>git checkout main Switched to branch 'main' Your branch is up to date with 'origin/main'.

■ test.txt - 记事本

文件(F) 编辑(E) 格式(O) 查看(V) 帮助(H)

git merge

```
J:\documents\Github\SE>git merge first_new_branch
Updating d0f0957..4605051
Fast-forward
test.txt | 1 +
1 file changed, 1 insertion(+)

J:\documents\Github\SE>git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)

nothing to commit, working tree clean

无文件要提交,干净的工作区
```

■ test.txt - 记事本

文件(F) 编辑(E) 格式(O) 查看(V) 帮助(H)

new feature

删除branch

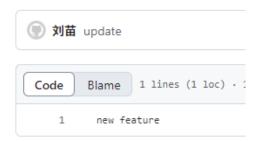

git branch -D branch名称

```
J:\documents\Github\SE>git branch -D first_new_branch
Deleted branch first_new_branch (was 4605051).
J:\documents\Github\SE>git branch
* main
```

同步到云端

```
J:\documents\Github\SE>git push origin
Enumerating objects: 5, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 8 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 279 bytes | 279.00 KiB/s, done.
Total 3 (delta 1), reused 0 (delta 0), pack-reused 0
remote: Resolving deltas: 100% (1/1), completed with 1 local object.
To https://github.com/LilaLius/SE.git
d0f0957..4605051 main -> main
```
